A Complete Technology Solution Provider

## **Backing up your important data off-site.**

Networks Connect, Inc. is owned by Dave Hoffman. Dave used to be a certified independent Shelby trainer for 16 years. Networks Connect is going on its 16<sup>th</sup> year in business and has been a business partner of Shelby Systems the entire time.

We are offering a VERY SECURE and encrypted backup solution for your Shelby data off-site. People say: "I am worried about my data going across the internet.....DON'T WORRY, Here are the precautions we have taken:

1. We will password protect the Shelby data files
2. We have the latest transfer Encryption methods that are hack proof
3. Our Servers are TRIPLY monitored. (1. It's on a sever farm 24/7/365 security – 2. Monitored by a professional network monitoring company 24/7, 3. Our servers are monitored by Networks Connect staff. (We are some of the most experienced computer consultants in the business).

Every day we hear about natural disasters. We want you to have a second backup solution in place WHEN the disaster takes place. It's a one-time setup fee of \$129. This includes the special backup software and install/configuration. Then \$49 a month (up to 25GB of data) and no annual contracts - it's month to month.

**You are paying for data peace of mind..... in the event of a natural disaster, you will have your critical data protected!**

Ask yourself these few simple questions and see what you get:

- Are you sure your Tape Backup tapes (which are kind of like a car cassette player tape) will actually be able to restore the data when the time comes (AND yes, the time WILL come one day)?
  1. When's the last time they were replaced? (SHOULD be Every 6 to 8 months)
  2. Has your IT person ever taken the time to try to restore data from them?
  3. Do you always take them off-site every night?
- Don't have it in the budget: Do you have the funds in the budget WHEN your server crashes and you aren't able to restore your Shelby data and you have to pay temps to re-enter ALL THAT DATA?
- My computer guy takes care of all the backups... We get calls ALL THE TIME from churches that say: "I THOUGHT they knew what they were doing with backing up our data but apparently they didn't".

**A backup solution that's secured for only \$49 a month....Try it...if you don't like it...give us a 30 notice and we are done.**
